# **Limited Covid-19 Impact**

2020 started very strongly, driven by all divisions and sustained demand. Our understanding is that the Covid-19 pandemic is not significantly affecting the group's operations and its ambitious capex plan. Furthermore, we believe that the expected forthcoming move to the STAR segment should be a positive catalyst for the stock.

#### 1Q20A Results

On 20 May the BoD approved the operating results as of 31 March 2020. Covid-19 has not significantly affected the group's operations and demand for the group's products and 2020 started very strongly, driven by sustained demand both in the agricultural and plaster retardant markets. However, part of the increase in revenues can reasonably be attributed to an advance on purchases to prevent a potential 'shortage effect' due to the Coronavirus.

#### Outlook/Estimates

As regards potential impacts arising from the pandemic, our understanding is that, as of today, the influence on the group's sales and orders has been very limited with reference to products linked to the agricultural sector. We underline that the plaster retardant segment (27% of total revenues in FY19) could however be more at risk due to the uncertain macro scenario. The group confirmed its significant investment plan started in 2018 (over EUR 60M capex within 2023) aimed at introducing new products and new production technologies. Overall, we decided to slightly revise downwards our estimates to project a more prudent stance on the sales from Plaster Retardant, assuming a decrease in volumes in 2020E. However, despite the Covid-19 outbreak, we expect a positive earnings momentum for the group thanks to the increasing demand for the group's agricultural products (driven by underlying macro trends), the improvement in fat prices, and the implementation of efficiencies at the group plants. Lastly, we roll-out our financial model to 2023E to capture a partial contribution from the granular fertiliser plant. We highlight that we do not expect any significant delay to the group's capex plan.

#### **Valuation**

Following the roll-out to 2023E of our financial model, we derived a new target price of EUR 12.0/share (from EUR 10.5/share). Given the current upside vs. market price of about 19%, we confirm our ADD recommendation on the stock.

#### 1Q20A Results

On 20 May the BoD approved the operating results as of 31 March 2020. Covid-19 has not significantly affected the group's operations and demand for the group's products and 2020 started very strongly, driven by sustained demand both in the agricultural and plaster retardant markets. However, part of the increase in revenues can reasonably be attributed to an advance on purchases to prevent a potential 'shortage effect' due to Coronavirus.

Regarding production, the group's activities were included in the list of those businesses considered essential and therefore proceeded almost as normal during the lockdown period. Raw materials intake was interrupted only for a few days and the group had the necessary stock to manage the situation.

The key points of results were:

- Consolidated revenues of EUR 19.7M vs. EUR 15.7M in 1Q19 (+25.6% yoy); the growth concerned all the group's main business areas with respect to 1Q19:
  - ☐ Biostimulants for agriculture rose by 29.9%;
  - □ Plaster retardants registered a 19.6% increase, driven by Asian demand;
  - □ Animal fat for the production of biofuels recovered sharply in 1Q (+27.3%);
  - Service revenues (raw materials) benefited from the higher capacity and better prices.

With reference to geographies, Italy recorded +3.5% yoy; Europe (Italy excluded) rose by 41%; APAC and Americas registered +40.2% and +13.9% respectively. The only areas that decreased were the Middle East and Africa (-8.1% yoy).

- Adjusted EBITDA was EUR 8.0M (vs. EUR 5.4M in 1Q19), with a margin of 40.4% on revenues. This increase was mainly due to: i) stable structural costs; and ii) the consolidation of SICIT Chemitech, which contributed with an EBITDA of EUR 0.6M in 1Q20 (the subsidiary was not included in the scope of consolidation in 1Q19, when it recorded EUR 0.5M EBITDA);
- Consolidated net cash available of EUR 29.6M (excluding warrants) vs. EUR 29.3M at YE19.

# **Earnings Outlook**

Looking at the potential impact arising from Covid-19, our understanding is that, as of today, the impact on the group's sales, orders and operations has been very limited, also favoured by group's significant exposure to the agricultural sector. However, we underline that the plaster retardant segment (27% of total revenues in FY19) could be the business most at risk due to the uncertain macro scenario.

From a production standpoint, the company specified that as from the middle of April an increasing number of Vicenza tanneries have restarted the so-called first tanning process; in addition, tanneries were included in activities authorised to operate from 4 May 2020 by Decree. The flows of raw materials have therefore been re-established, although at reduced volumes compared to those recorded during the periods prior to the emergency.

The group confirmed its significant investment plan started in 2018 (over EUR 60M capex within 2023) aimed at introducing new products and new production technologies (such as the production of hydrolysed protein from hair and a quality improvement of fats).

Overall, despite the Covid-19 outbreak, we expect a positive earnings momentum for the group thanks to the encouraging outlook for agricultural products, the improvement in the fat price and the ramp-up of the 'hair' plant. We continue to appreciate the increasing demand for the group's products, driven by underlying macro trends, the group's sound margins and ROCE and the strong cash flow generation coupled with an appealing dividend policy.

On 29 April, SICIT announced it had filed the documents with CONSOB for the listing on the main market (MTA) on the STAR segment. The move to the main market is expected by the end of June with positive implications for the stock since it will likely improve the liquidity as well as visibility.

#### **Estimates revision**

We decided to slightly revise downwards our estimates to project a more prudent stance on the sales from Plaster Retardant, assuming a decrease in volumes in 2020E. On the other hand, we project sustained growth in the other two business lines thanks to the expected favorable season for agricultural products, the improvement in fat price and the ramp up of the hair plant. In particular, regarding biostimulants, we expect a 10% increase in volumes in 2020E and 6% YoY growth from 2021 to 2023 and slightly increasing prices (around 2% YoY).

Lastly, we roll-out our financial model to 2023E to capture a partial contribution from the granular fertilizer plant. We recall that we do not expect any significant delay to the group's capex plan.

We highlight that any unpredictable further developments related to the Covid-19 health emergency could undermine the feasibility of these estimates.

#### **Valuation**

As usual, we evaluate SICIT with a DCF model, due to the absence of listed companies with a similar size, background and/or geographical presence in the group's reference industry. Following the roll-out to 2023E of our financial model, we derived **a new target price of EUR 12.0/share** (from EUR 10.5/share). Given the current upside vs. market price of about 19%, we confirm our ADD recommendation on the stock.

#### DCF Model

The main assumptions in our DCF model are as follows:

- Explicit estimates until 2023E;
- Terminal value growth is set at 1%, while to calculate the LT, we applied the revenues and EBIT margin we forecast for FY23E.

For the WACC calculation, we used a risk-free rate at 1.5%, a risk premium at 7.5% and a Beta of 0.9x (Source: Intesa Sanpaolo Research elaboration on Factset data). In line with the current debt structure, we used a 0% 'target' gearing ratio. As a result, we derived a WACC of 8.25%.

# **Company Snapshot**

#### **Company Description**

Founded in Chiampo (Vicenza, Italy), the group, through a hydrolysis process of waste from the tanning industry, manufactures and sells value-added products for agriculture (biostimulants) and the industrial market (plaster retardants). The group was the first company to introduce special fertilisers based on amino acids & peptides in the global market in the 1960s and nowadays is a leader in the segment, operating in more than 90 countries. In the collection of raw materials, we highlight that SICIT carries out a paid service for the collection of waste from the tanneries of the Vicenza district.

#### **Key Risks**

#### Company specific risks:

- Dependence on raw material availability from the Arzignano district;
- Limited product diversification in biostimulants;
- Potential dilution and overhang risk due to the conversion of special shares and warrants.

#### Sector generic risks:

- Unfavourable weather conditions;
- Increasing competition from companies which produce biostimulats from other sources, which could jeopardise the company's market share:
- Animal illnesses may affect operations and cause a slowdown in demand of biostimulants from animals.

# **Our Mid Corporate Definition**

Italy is characterised by a large number of non-listed and listed micro, small and medium-sized companies. Looking at the revenues of these Italian companies, around 5,000 companies have revenues ranging from EUR 50M-EUR 1,500M based on Intesa Sanpaolo elaborations. We define these companies as 'Mid Corporate'. Looking more specifically at Italian listed companies, we include in our Mid Corporate segment all STAR companies and those with a market capitalisation below EUR 1Bn.

#### Valuation methodology (long-term horizon: 12M)

The Intesa Sanpaolo SpA Equity Research Department values the companies for which it assigns recommendations as follows:

We obtain a fair value using a number of valuation methodologies including: discounted cash flow method (DCF), dividend discount model (DDM), embedded value methodology, return on allocated capital, break-up value, asset-based valuation method, sum-of-the-parts, and multiples-based models (for example PE, P/BV, PCF, EV/Sales, EV/EBITDA, EV/EBIT, etc.). The financial analysts use the above valuation methods alternatively and/or jointly at their discretion. The assigned target price may differ from the fair value, as it also takes into account overall market/sector conditions, corporate/market events, and corporate specifics (ie, holding discounts) reasonably considered to be possible drivers of the company's share price performance. These factors may also be assessed using the methodologies indicated above.

#### Equity rating key: (long-term horizon: 12M)

In its recommendations, Intesa Sanpaolo SpA uses an "absolute" rating system, which is not related to market performance and whose key is reported below:

#### Equity Rating Key (long-term horizon: 12M)

| Long-term rating | Definition  |
|------------------|---|
| BUY              | If the target price is 20% higher than the market price   |

#### Valuation methodology (short-term horizon: 3M)

Our short-term investment ideas are based on ongoing special market situations, including among others: spreads between share categories; holding companies vs. subsidiaries; stub; control chain reshuffling; stressed capital situations; potential extraordinary deals (including capital increase/delisting/extraordinary dividends); and preys and predators. Investment ideas are presented either in relative terms (e.g. spread ordinary vs. savings; holding vs. subsidiaries) or in absolute terms (e.g. preys).

The companies to which we assign short-term ratings are under regular coverage by our research analysts and, as such, are subject to fundamental analysis and long-term recommendations. The main differences attain to the time horizon considered (monthly vs. yearly) and definitions (short-term 'long/short' vs. long-term 'buy/sell'). Note that the short-term relative recommendations of these investment ideas may differ from our long-term recommendations. We monitor the monthly performance of our short-term investment ideas and follow them until their closure.
